Elabscience®

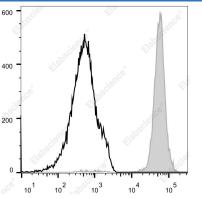

Elab Fluor[®] Violet 540 Anti-Human CD45 Antibody[HI30]

Catalog Number: E-AB-F1137T3

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description		
Reactivity	Human	
Host	Mouse	
lsotype	Mouse IgG1, κ	
Clone No.	HI30	
Isotype Control	Elab Fluor [®] Violet 540 Mouse IgG1, к Isotype Control[MOPC-21] [Product E-AB- F09792T3]	
Conjugation	Elab Fluor [®] Violet 540	
Conjugation Information	Elab Fluor [®] Violet 540 is designed to be excited by the violet laser (405 nm) and detected using an optical filter centered near 548 nm (e.g., a 572/28 nm bandpass filter).	
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.	
Applications	Recommended usage	
FCM	Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.	

Staining of normal human peripheral blood cells with Elab

Fluor[®] Violet 540 Anti-Human CD45 Antibody[HI30](filled gray histogram) or Elab Fluor[®] Violet 540 Mouse IgG1, κ Isotype Control(empty black histogram). Cells in the lymphocytes gate were used for analysis.

Preparation & Storage		
Storage	Keep as concentrated solution. This product can be stored at 2-8°C for 12 months. Please protected from prolonged exposure to light and do not freeze.	
Shipping	Ice bag	
Antigen Information		
Alternate Names	CD45;L-CA;Ly-5;Ptprc;Receptor-type tyrosine-protein phosphatase C;T200	
Uniprot ID	P08575	
For Research Use Onl	y

Gene ID Background

5788

CD45 is a 180 - 240 kD single chain type I membrane glycoprotein also known as leukocyte common antigen (LCA) and T200. It is a tyrosine phosphatase expressed on the plasma membrane of all hematopoietic cells, except erythrocytes or platelets. CD45 is a signaling molecule that regulates a variety of cellular processes including cell growth, differentiation, cell cycle, and oncogenic transformation. CD45 plays a critical role in T and B cell antigen receptor-mediated activation by dephosphorylating substrates including p56Lck, p59Fyn, and other Src family kinases. CD45 noncovalently associates with lymphocyte phosphatase-associated phosphoprotein (LPA P) on T and B lymphocytes. CD45 has been reported to bind galectin-1 and to be associated with several other cell surface antigens including CD1, CD2, CD3, and CD4
