Elabscience Biotechnology Co., Ltd.

A Reliable Research Partner in Life Science and Medicine

IFABP Polyclonal Antibody

catalog number: D-AB-10381L

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity Mouse; Rat

Immunogen Recombinant Human IFABP protein expressed by E.coli

Host Rabbit Isotype IgG

Purification Antigen Affinity Purification

Conjugation Unconjugated

Buffer PBS with 0.05% Proclin300, 1% protective protein and 50% glycerol, pH7.4

Applications Recommended Dilution

WB 1:500-1:1000

Data

Western blot with IFABP Polyclonal antibody at dilution of

1:1000.lane 1:Mouse small intestine,lane 2:Rat small

intestine

Observed-MW:15 kDa Calculated-MW:15 kDa

Preparation & Storage

Storage Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.

Shipping The product is shipped with ice pack,upon receipt, store it immediately at the

temperature recommended.

Background

The intracellular fatty acid-binding proteins (FABPs) belong to a multigene family with nearly twenty identified member s. FABPs are divided into at least three distinct types,namely the hepatic-,intestinal- and cardiac-type. They form 14-15 kDa proteins and are thought to participate in the uptake,intracellular metabolism and/or transport of long-chain fatty acids. They may also be responsible in the modulation of cell growth and proliferation. Intestinal fatty acid-binding protein 2 gene contains four exons and is an abundant cytosolic protein in small intestine epithelial cells. This gene has a polymorphism at codon 54 that identified an alanine-encoding allele and a threonine-encoding allele. Thr-54 protein is associated with increased fat oxidation and insulin resistance.
