

Recombinant SARS-CoV-2 NP CTD domain V2(C-6His)

Catalog Number: PKSV030279

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Species	SARS-CoV-2
Source	E.coli-derived SARS-CoV-2 Nucleocapsid protein Thr247-Pro364, with an N-terminal His
Mol_Mass	17.1 kDa
Accession	QHD43423.2
Bio-activity	Not validated for activity

Properties

Purity	> 95 % as determined by reducing SDS-PAGE.
Endotoxin	Please contact us for more information.
Storage	Store at < -20°C, stable for 6 months. Please minimize freeze-thaw cycles.
Shipping	This product is provided as liquid. It is shipped at frozen temperature with blue ice/gel packs. Upon receipt, store it immediately at < -20°C.
Formulation	Supplied as a 0.2 µM filtered solution of 50mM PB, 150mM NaCl, 1mM EDTA, pH 7.4
Reconstitution	Not Applicable

Data

Background

Coronavirus N protein is required for coronavirus RNA synthesis, and has RNA chaperone activity that may be involved in template switch. Nucleocapsid protein is a most abundant protein of coronavirus. N protein packages the positive strand viral genome RNA into a helical ribonucleocapsid (RNP) and plays a fundamental role during virion assembly through its interactions with the viral genome and membrane protein M. Plays an important role in enhancing the efficiency of subgenomic viral RNA transcription as well as viral replication. Because of the conservation of N protein sequence and its strong immunogenicity, the N protein of coronavirus is chosen as a diagnostic tool.
