

Human LH Antibody Pair Set

Catalog No. E-KAB-0129

Applications

ELISA

Synonyms Lutropin, Lutrophin

Kit components & Storage

Title	Specifications	Storage
Human LH Capture Antibody	1 vial, 100 µg	Store at -20℃ for one year. Avoid freeze / thaw cycles.
Human LH Detection Antibody (Biotin)	1 vial, 50 µL	Store at -20℃ for one year. Avoid freeze / thaw cycles.

Note: Centrifuge before opening to ensure complete recovery of vial contents.

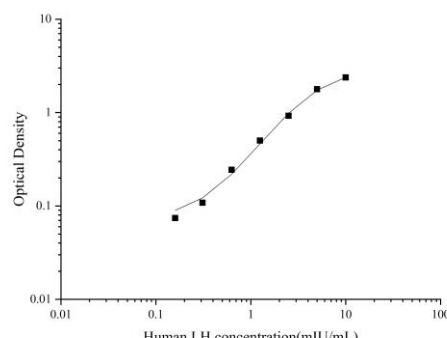

Product Information

Items		Characteristic (E-KAB-0129)	
		Human LH Capture Antibody	Human LH Detection Antibody (Biotin)
Immunogen Information	Immunogen	Native Protein	Native Protein
	Swissprot	P01229(LH beta)	
Product details	Reactivity	Human	Human
	Host	Mouse	Mouse
	Conjugation	Unconjugated	Biotin
	Concentration	0.5mg/mL	/
	Buffer	PBS with 0.04% Proclin 300, 50% glycerol, pH 7.4	PBS with 0.04% Proclin 300, 1% protective protein, 50% glycerol, pH 7.4
	Purify	Protein A	Protein A
	Specificity	Detects Human LH in ELISAs.	

For Research Use Only

Applications

Human LH Sandwich ELISA Assay:

	Recommended Concentration/Dilution	Reagent	Images																
ELISA Capture	0.5-4μg/mL	Human LH Capture Antibody	 <table><caption>Approximate data points from the standard curve</caption><thead><tr><th>Human LH concentration (mIU/mL)</th><th>Optical Density</th></tr></thead><tbody><tr><td>0.1</td><td>0.08</td></tr><tr><td>0.2</td><td>0.12</td></tr><tr><td>0.5</td><td>0.25</td></tr><tr><td>1.0</td><td>0.5</td></tr><tr><td>2.0</td><td>1.0</td></tr><tr><td>5.0</td><td>2.5</td></tr><tr><td>10.0</td><td>4.0</td></tr></tbody></table>	Human LH concentration (mIU/mL)	Optical Density	0.1	0.08	0.2	0.12	0.5	0.25	1.0	0.5	2.0	1.0	5.0	2.5	10.0	4.0
Human LH concentration (mIU/mL)	Optical Density																		
0.1	0.08																		
0.2	0.12																		
0.5	0.25																		
1.0	0.5																		
2.0	1.0																		
5.0	2.5																		
10.0	4.0																		
ELISA Detection	1:1000-1:10000	Human LH Detection Antibody (Biotin)																	

Note: This standard curve is only for demonstration purposes. A standard curve should be generated for each assay!

Background

This gene is a member of the glycoprotein hormone beta chain family and encodes the beta subunit of luteinizing hormone (LH). Glycoprotein hormones are heterodimers consisting of a common alpha subunit and an unique beta subunit which confers biological specificity. LH is expressed in the pituitary gland and promotes spermatogenesis and ovulation by stimulating the testes and ovaries to synthesize steroids. The genes for the beta chains of chorionic gonadotropin and for luteinizing hormone are contiguous on chromosome 19q13.3. Mutations in this gene are associated with hypogonadism which is characterized by infertility and pseudohermaphroditism.
