Elabscience®

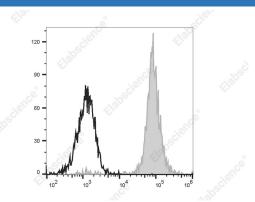

PE/Elab Fluor[®] 594 Anti-Human CD14 Antibody[M5E2]

Catalog Number: E-AB-F1209P

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Reactivity	Human
Host	Mouse
lsotype	Mouse IgG2a, κ
Clone No.	M5E2
Isotype Control	PE/Elab Fluor [®] 594 Mouse IgG2a, к Isotype Control[C1.18.4] [Product E-AB-F09802P]
Conjugation	PE/Elab Fluor [®] 594
Conjugation Information	PE/Elab Fluor [®] 594 is designed to be excited by the blue (488 nm), Green (532 nm) and yellow-green (561 nm) lasers and detected using an optical filter centered near 620 nm (e.g., a 610/20 nm bandpass filter).
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.
Applications	Recommended usage
FCM	Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Staining of normal human peripheral blood cells with PE/Elab

Fluor[®] 594 Anti-Human CD14 Antibody[M5E2] (filled gray histogram) or PE/Elab Fluor[®] 594 Mouse IgG2a, κ Isotype Control (empty black histogram). Cells in the lymphocytes gate were used for analysis.

Preparation & Storage		
Storage	Keep as concentrated solution.	
	This product can be stored at 2-8°C for 12 months. Please pro exposure to light and do not freeze.	tected from prolonged
Shipping	Ice bag	
Antigen Information		
Alternate Names	CD14;Monocyte differentiation antigen CD14;Myeloid cell-spec glycoprotein	ific leucine-rich

CD14 is a 53-55 kD glycosylphosphatidylinositol (GPI)-linked membrane glycoprotein also known as LPS receptor. CD14 is expressed at high levels on monocytes and macrophages, and at lower levels on granulocytes. Some dendritic cell populations such as interfollicular dendritic cells, reticular dendritic cells, and Langerhans cells have also been reported to express CD14. As a high-affinity receptor for LPS, CD14 is involved in the clearance of gram-negative pathogens, and in the upregulation of adhesion molecules and expression of cytokines in monocytes and neutrophils.
