SARS-COV-2 NP Monoclonal Antibody (2019-nCoV)

catalog number: E-AB-V1013

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Reactivity SARS-COV2

Immunogen Recombinant 2019-nCoV Nucleoprotein / NP Protein

HostMouseIsotypeIgGlCloneM05

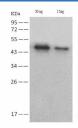

Conjugation Unconjugated

buffer 0.2 μm filtered solution in PBS.

Applications Recommended Dilution

WB 1:1000-1:5000

Data

Western Blot analysis of SARS-CoV2-NP protein using SARS-COV/SARS-COV-2 NP Monoclonal Antibody(2019-

nCoV) at dilution of 1:1000

Preparation & Storage

Storage Storage Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.

Shipping The product is shipped with ice pack, upon receipt, store it immediately at the

temperature recommended.

Background

Coronavirus N protein is required for coronavirus RNA synthesis, and has RNA chaperone activity that may be involved in template switch. Nucleocapsid protein is a most abundant protein of coronavirus. N protein packages the positive strand viral genome RNA into a helical ribonucleocapsid (RNP) and plays a fundamental role during virion assembly through its interactions with the viral genome and membrane protein M. Plays an important role in enhancing the efficiency of subgenomic viral RNA transcription as well as viral replication. Because of the conservation of N protein sequence and its strong immunogenicity, the N protein of coronavirus is chosen as a diagnostic tool.
