## **Elabscience**®

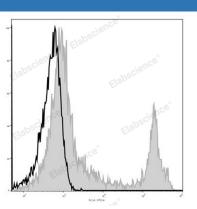

### Elab Fluor<sup>®</sup> 488 Anti-Mouse CD45R/B220 Antibody[RA3.3A 1/6.1]

#### Catalog Number: E-AB-F1112L

Note: Centrifuge before opening to ensure complete recovery of vial contents.

| Description             |  |
|-------------------------|--|
| Reactivity              | Mouse  |
| Host                    | Rat  |
| lsotype                 | Rat IgM, κ   |
| Clone No.               | RA3.3A 1/6.1   |
| Isotype Control         | Elab Fluor <sup>®</sup> 488 Rat IgM, κ Isotype Control[RTK2118] [Product E-AB-F09772L]   |
| Conjugation             | Elab Fluor <sup>®</sup> 488  |
| Conjugation Information | Elab Fluor <sup>®</sup> 488 is designed to be excited by the Blue laser (488 nm) and detected using an optical filter centered near 520 nm (e.g., a 525/40 nm bandpass filter).  |
| Storage Buffer          | Phosphate buffered solution, pH 7.2, containing 0.09% sodium azide and 1% BSA.   |
| Applications            | Recommended usage  |
| FCM                     | Each lot of this antibody is quality control tested by flow cytometric analysis. The amount<br>of the reagent is suggested to be used 5 µL of antibody per test (million cells in 100<br>µL staining volume or per 100 µL of whole blood). Please check your vial before the<br>experiment. Since applications vary, the appropriate dilutions must be determined for<br>individual use. |

Data

C57BL/6 murine splenocytes are stained with Elab Fluor<sup>®</sup> 488 Anti-Mouse CD45R/B220 Antibody (filled gray histogram). Unstained splenocytes (empty black histogram) are used as control.

| Preparation & Storage |  |
|-----------------------|--|
| Storage               | Keep as concentrated solution.   |
| Shipping              | This product can be stored at 2-8°C for 12 months. Please protected from prolonged exposure to light and do not freeze.<br>Ice bag |
| Antigen Information   |  |
| Alternate Names       | B220   |
| Gene ID               | 19264,5788   |

#### For Research Use Only

Background

CD45R, also known as B220, is an isoform of CD45. It is a member of the protein tyrosine phosphatase (PTP) family with a molecular weight of approximately 180-240 kD. CD45R is expressed on B cells (at all developmental stages from pro-B cells through mature B cells), activated B cells, and subsets of T and NK cells. CD45R ( B220) is also expressed on a subset of abnormal T cells involved in the pathogenesis of systemic autoimmunity in MRL-Fas<sup>lpr</sup> and MRL-Fas<sup>gld</sup> mice. It plays a critical role in TCR and BCR signaling. The primary ligands for CD45 are galectin-1, CD2, CD3, and CD4. CD45R is commonly used as a pan-B cell marker; however, CD19 may be more appropriate for B cell specificity.
