# **MYOT Polyclonal Antibody**

catalog number: E-AB-52979

Note: Centrifuge before opening to ensure complete recovery of vial contents.

#### **Description**

Reactivity Human; Mouse

**Immunogen** Fusion protein of human MYOT

Host Rabbit Isotype IgG

**Purification** Antigen affinity purification

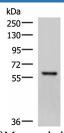

**Conjugation** Unconjugated

**Buffer** Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.

### Applications Recommended Dilution

**WB** 1:1000-1:5000 **IHC** 1:50-1:300

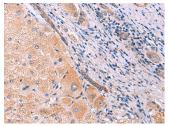

#### Data

Western blot analysis of Mouse skeletal muscle tissue lysate using MYOT Polyclonal Antibody at dilution of 1:1000

Immunohistochemistry of paraffin-embedded Human tonsil tissue using MYOT Polyclonal Antibody at dilution of  $1:70(\times 200)$ 

## Observed-MW:Refer to figures Calculated-MW:55 kDa

Immunohistochemistry of paraffin-embedded Human liver cancer tissue using MYOT Polyclonal Antibody at dilution of  $1:70(\times 200)$ 

### **Preparation & Storage**

Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.

**Shipping** The product is shipped with ice pack, upon receipt, store it immediately at the

Web: www.elabscience.cn

temperature recommended.

### Background

#### For Research Use Only

This gene encodes a cystoskeletal protein which plays a significant role in the stability of thin filaments during muscle contraction. This protein binds F-actin, crosslinks actin filaments, and prevents latrunculin A-induced filament disassembly. Mutations in this gene have been associated with limb-girdle muscular dystrophy and myofibrillar myopathies. Several alternatively spliced transcript variants of this gene have been described, but the full-length nature of some of these variants has not been determined.
