# Recombinant Human GADD45A/DDIT-1 Protein (His Tag)

Catalog Number: PKSH033661

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Species	Human
Mol_Mass	20.5 kDa

Accession P24522

**Bio-activity** Not validated for activity

### **Properties**

**Purity** > 95 % as determined by reducing SDS-PAGE.

Endotoxin < 1.0 EU per µg of the protein as determined by the LAL method.

**Storage** Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80

°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of

reconstituted samples are stable at < -20°C for 3 months.

**Shipping** This product is provided as lyophilized powder which is shipped with ice packs.

**Formulation** Lyophilized from a 0.2 μm filtered solution of PBS, pH 7.4.

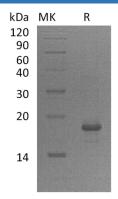

Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants

before lyophilization.

Please refer to the specific buffer information in the printed manual.

**Reconstitution** Please refer to the printed manual for detailed information.

# **Data**

> 95 % as determined by reducing SDS-PAGE.

#### Background

Growth Arrest and DNA Damage-Inducible Protein GADD45  $\alpha$  (GADD45A) is a member of the GADD45 family. GADD45A can be induced by UV irradiation; X-rays; growth arrest and alkylating agents; of which can be mediated by some kinases other than PKC. GADD45A can interact with MAPK14; GADD45GIP1; PCNA. In T-cells; GADD45A functions as a regulator of p38 MAPKs by inhibiting p88 phosphorylation and activity. GADD45A may affect PCNA interaction with some cell division protein kinase complexes; stimulating DNA excision repair in vitro and inhibits entry of cells into S phase.
