

## Water For Injection (WFI) for Cell Culture

Cat. No. : PB180518W

Size: 500mL

### General Information

<b>Product Form</b>	Liquid
<b>Concentration</b>	1 ×
<b>pH</b>	4.00-7.50
<b>Endotoxin</b>	< 0.25 EU/mL
<b>Storage</b>	2-30°C
<b>Shipping</b>	Room Temperature
<b>Expiration date</b>	36 months

### Background

Water For Injection for cell culture (WFI) is made by distilling ultrapure water at a high temperature 8 times. It does not add any substances and has the advantage of ultra-low endotoxin. It can be used for dissolving dry powder culture media, preparing solutions, preparing various buffer solutions, as well as cleaning and rinsing agents.

### Product characteristics

This product has the characteristic of ultra-low endotoxin, with regular monitoring of conductivity and total organic carbon content to ensure cell culture requirements.

### Notes

1. This product is for research use only.
2. This product is sterilized by 0.1 µm filtration.
3. It is necessary to pay attention to the aseptic operation and avoid the contamination.
