A Reliable Research Partner in Life Science and Medicine

Recombinant Human CXCL12/SDF-1 Protein (aa19-93)

Catalog Number: PKSH032294

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Species Human

Source E.coli-derived Human CXCL12; SDF-1 protein Ser19-Met93

Calculated MW 8.8 kDa Observed MW 12 kDa Accession P48061

Bio-activity Not validated for activity

Properties

Purity > 95 % as determined by reducing SDS-PAGE.

< 1.0 EU per μg of the protein as determined by the LAL method. Endotoxin

Storage Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80

°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of

reconstituted samples are stable at < -20°C for 3 months.

This product is provided as lyophilized powder which is shipped with ice packs. Shipping

Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4. Formulation

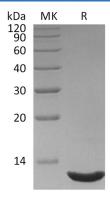

Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants

before lyophilization.

Please refer to the specific buffer information in the printed manual.

Please refer to the printed manual for detailed information. Reconstitution

Data

> 95 % as determined by reducing SDS-PAGE.

Background

Stromal Cell-Derived Factor-1 (SDF-1) is a chemokine member of the intercrine family. SDF1 is expressed as five isoforms that differ only in the C terminal tail. SDF1α and SDF1β are identical except for the four residues present in the Cterminus of SDF1\beta but absent from SDF1\alpha. SDF1 isoforms interact with CXCR4 and CXCR7 receptors on the cell surface; and can also bind syndecan4. SDF1 is known to influence lymphopoiesis; regulate patterning and cell number of neural progenitors; and promote angiogenesis. It also enhances the survival of myeloid progenitor cells.
