# Human LIF Antibody Pair Set

| Catalog No. | E-KAB-0535          | Applications | ELISA |
|-------------|---------------------|--------------|-------|
| Synonyms    | CDF;DIA;HILDA;MLPLI |              |       |

### **Kit components & Storage**

| Title                                 | Specifications  | Storage                                |
|---------------------------------------|-----------------|--|
| Human LIF Capture Antibody            | 1 vial, 100 µ g | Store at $-20^{\circ}$ C for one year. |
|                                       |                 | Avoid freeze/thaw cycles.              |
| Human LIF Detection Antibody (Biotin) | 1 vial, 50 μL   | Store at $-20^{\circ}$ C for one year. |
|                                       |                 | Avoid freeze/thaw cycles.              |

Note: Centrifuge before opening to ensure complete recovery of vial contents.

### **Product Information**

| Items           |               | Characteristic (E-KAB-0535)     |                                      |
|-----------------|---------------|---------------------------------|--------------------------------------|
|                 |               | Human LIF Capture Antibody      | Human LIF Detection Antibody         |
|                 |               | Human En Capture Antibody       | (Biotin)                             |
| Immunogen       | Immunogen     | Recombinant Human LIF protien   | Recombinant Human LIF protien        |
| Information     | Swissprot     | P15018                          |                                      |
| Product details | Reactivity    | Human                           | Human                                |
|                 | Host          | Goat                            | Goat                                 |
|                 | Conjugation   | Unconjugated                    | Biotin                               |
|                 | Concentration | 0.5 mg/mL                       | /                                    |
|                 | Buffer        | PBS with 0.04% Proclin 300; 50% | PBS with 0.04% Proclin 300; 1%       |
|                 |               | glycerol; pH 7.5                | protective protein; 50% glycerol; pH |
|                 |               |                                 | 7.5                                  |
|                 | Purify        | Antigen Affinity                | Antigen Affinity                     |
|                 | Specificity   | Detects Human LIF in ELISAs.    |                                      |

## Applications

#### Human LIF Sandwich ELISA Assay:

|           | Recommended            | Reagent             | Images  |
|-----------|------------------------|---------------------|---|
|           | Concentration/Dilution |                     |   |
| ELISA     | 0.5-4 μg/mL            | Human LIF Capture   |   |
| Capture   |                        | Antibody            | 10  |
|           |                        |                     | _   |
|           |                        |                     | ensity  |
| ELISA     | 1:1000-1:10000         | Human LIF Detection | Optical Density                                     |
| Detection |                        | Antibody (Biotin)   |   |
|           |                        |                     | 0.1   |
|           |                        |                     | 10 100 1000 10000<br>Human LIF Concentration(pg/mL) |
|           |                        |                     | ruman in Concentrationpg/mL)                        |

Note: This standard curve is only for demonstration purposes. A standard curve should be generated for each assay!

### Background

The protein encoded by this gene is a pleiotropic cytokine with roles in several different systems. It is involved in the induction of hematopoietic differentiation in normal and myeloid leukemia cells, induction of neuronal cell differentiation, regulator of mesenchymal to epithelial conversion during kidney development, and may also have a role in immune tolerance at the maternal-fetal interface. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene.
