

A Reliable Research Partner in Life Science and Medicine

Recombinant MAPKAPK-2 Monoclonal Antibody

catalog number: AN300648L

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity Human; Mouse; Rat

Immunogen Recombinant Human MAPKAPK-2 protein

HostRabbitIsotypeIgG,KCloneB583PurificationProtein A

Buffer PBS, 50% glycerol, 0.05% Proclin 300, 0.05% protein protectant.

Applications Recommended Dilution

WB 1:2000-1:10000

Data

Western Blot with Recombinant MAPKAPK-2 Monoclonal Antibody at dilution of 1:1000 dilution. Lane A: Rat heart whole cell lysate.

Observed-MW:46,55 kDa Calculated-MW:46 kDa

Preparation & Storage

Storage Storage Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.

Shipping Ice bag

Background

This gene encodes a member of the Ser/Thr protein kinase family. This kinase is regulated through direct phosphorylation by p38 MAP kinase. In conjunction with p38 MAP kinase, this kinase is known to be involved in many cellular processes including stress and inflammatory responses, nuclear export, gene expression regulation and cell proliferation. Heat shock protein HSP27 was shown to be one of the substrates of this kinase in vivo. Two transcript variants encoding two different isoforms have been found for this gene.
