# Recombinant Sox2 Monoclonal Antibody

**catalog number: AN300134P**

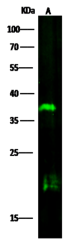
**Note:** *Centrifuge before opening to ensure complete recovery of vial contents.*

## Description

| | |
|---|---|
| **Reactivity** | Human |
| **Immunogen** | A synthetic peptide corresponding to the N-terminus of the human Sox2. |
| **Host** | Rabbit |
| **Isotype** | IgG |
| **Clone** | 3G4 |
| **Purification** | Protein A |
| **Buffer** | 0.2 μm filtered solution in PBS |

| Applications | Recommended Dilution |
|---|---|
| **WB** | 1:500-1:2000 |

## Data



Western Blot with Sox2 Monoclonal Antibody at dilution of 1:500. Lane A: hESC-H9 Whole Cell Lysate, Lysates/proteins at 30 μg per lane.

**Observed-MW:37 kDa**

**Calculated-MW:34 kDa**

## Preparation & Storage

| | |
|---|---|
| **Storage** | This antibody can be stored at 2℃-8℃ for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20℃ to -80℃. Preservative-Free. Avoid repeated freeze-thaw cycles. |
| **Shipping** | Ice bag |

## Background

This intronless gene encodes a member of the SRY-related HMG-box (SOX) family of transcription factors involved in the regulation of embryonic development and in the determination of cell fate. The product of this gene is required for stem-cell maintenance in the central nervous system, and also regulates gene expression in the stomach. Mutations in this gene have been associated with optic nerve hypoplasia and with syndromic microphthalmia, a severe form of structural eye malformation. This gene lies within an intron of another gene called SOX2 overlapping transcript ( SOX2OT).
