

## PE Rat IgG1, κ Isotype Control[HRPN]

**Catalog Number:** GFH09823D

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

| Description                    |                                                                                                                                                                                                   |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Host</b>                    | Rat                                                                                                                                                                                               |
| <b>Isotype</b>                 | Rat IgG1, κ                                                                                                                                                                                       |
| <b>Clone No.</b>               | HRPN                                                                                                                                                                                              |
| <b>Conjugation</b>             | PE                                                                                                                                                                                                |
| <b>Conjugation Information</b> | PE is designed to be excited by the Blue (488 nm), Green (532 nm) and Yellow-Green (561 nm) lasers and detected using an optical filter centered near 575 nm (e.g., a 585/42 nm bandpass filter). |
| <b>Storage Buffer</b>          | Phosphate buffered solution, pH 7.2, containing 0.09% sodium azide.                                                                                                                               |
| Applications                   |                                                                                                                                                                                                   |
| <b>FCM</b>                     | Each lot of this antibody is quality control tested by flow cytometric analysis as negative control. Use at concentrations comparable to those of the specific antibody of interest.              |
| Preparation & Storage          |                                                                                                                                                                                                   |
| <b>Storage</b>                 | Keep as concentrated solution.<br>This product can be stored at 2-8°C for 12 months. Please protected from prolonged exposure to light and do not freeze.                                         |
| <b>Shipping</b>                | Ice bag                                                                                                                                                                                           |
