

A Reliable Research Partner in Life Science and Medicine

# **HIST1H2BK Polyclonal Antibody**

catalog number: E-AB-52805

Note: Centrifuge before opening to ensure complete recovery of vial contents.

### **Description**

Reactivity Human; Mouse

Immunogen Fusion protein of human HIST1H2BK

Host Rabbit
Isotype IgG

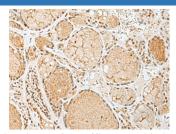

Purification Antigen affinity purification

**Buffer** Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.

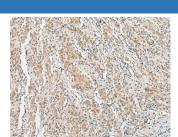

# **Applications** Recommended Dilution

**IHC** 1:40-1:200

#### Data

Immunohistochemistry of paraffin-embedded Human thyroid cancer tissue using HIST1H2BK Polyclonal Antibody at dilution of 1:60(×200)

Immunohistochemistry of paraffin-embedded Human cervical cancer tissue using HIST1H2BK Polyclonal Antibody at dilution of 1:60(×200)

### Preparation & Storage

Storage Storage Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.

**Shipping** The product is shipped with ice pack, upon receipt, store it immediately at the

temperature recommended.

## Background

Histones are basic nuclear proteins that are responsible for the nucleosome structure of the chromosomal fiber in eukaryotes. Two molecules of each of the four core histones (H2A, H2B, H3, and H4) form an octamer, around which approximately 146 bp of DNA is wrapped in repeating units, called nucleosomes. The linker histone, H1, interacts with linker DNA between nucleosomes and functions in the compaction of chromatin into higher order structures. This gene encodes a replication-dependent histone that is a member of the histone H2B family. The protein encoded is an antimicrobial protein with antibacterial and antifungal activity. Two transcripts that encode the same protein have been identified for this gene, which is found in the histone microcluster on chromosome 6p21.33.
