A Reliable Research Partner in Life Science and Medicine

# **Erythropoietin/EPO Monoclonal Antibody(Capture)**

catalog number: AN001960P

Note: Centrifuge before opening to ensure complete recovery of vial contents.

# Description

**Reactivity** Mouse

Immunogen Recombinant Mouse Erythropoietin/EPO protein expressed by E.coli

Host Rat
Isotype Rat IgG2a
Clone 8C3

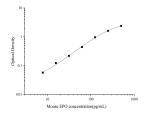

**Purification** Protein A/G Purification

**Buffer** Phosphate buffered solution, pH 7.2, containing 0.05% Proclin300.

**Applications** Recommended Dilution

ELISA Capture 2-8 μg/mL

## Data

Sandwich ELISA-Recombinant Mouse Erythropoietin/EPO protein standard curve.Background subtracted standard curve using Erythropoietin/EPO antibody(AN001960P) (Capture),Erythropoietin/EPO antibody(AN001970P) (Detector) in sandwich ELISA.The reference range value for Recombinant Mouse Erythropoietin/EPO protein is 7.81-500 pg/mL.

#### **Preparation & Storage**

Storage Storage Store at 4°C valid for 12 months or -20°C valid for long term storage, avoid freeze /

thaw cycles.

**Shipping** The product is shipped with ice pack, upon receipt, store it immediately at the

temperature recommended.

# Background

This gene encodes a secreted, glycosylated cytokine composed of four alpha helical bundles. The encoded protein is mainly synthesized in the kidney, secreted into the blood plasma, and binds to the erythropoietin receptor to promote red blood cell production, or erythropoiesis, in the bone marrow. Expression of this gene is upregulated under hypoxic conditions, in turn leading to increased erythropoiesis and enhanced oxygen-carrying capacity of the blood. Expression of this gene has also been observed in brain and in the eye, and elevated expression levels have been observed in diabetic retinopathy and ocular hypertension. Recombinant forms of the encoded protein exhibit neuroprotective activity against a variety of potential brain injuries, as well as antiapoptotic functions in several tissue types, and have been used in the treatment of anemia and to enhance the efficacy of cancer therapies.
