## Recombinant Human Choriogonadotropin Subunit Beta 3/CGB3 Protein (His Tag)

Catalog Number: PKSH032251

Endotoxin< 1.0 EU per μg of the protein as determined by the IStorageGenerally, lyophilized proteins are stable for up to 12 °C. Reconstituted protein solution can be stored at 4 reconstituted samples are stable at < -20°C for 3 monShippingThis product is provided as lyophilized powder whic Lyophilized from a 0.2 μm filtered solution of 20mM Normally 5% - 8% trehalose, mannitol and 0.01% Tw before lyophilization.ReconstitutionPlease refer to the specific buffer information in the p			
AccessionP0DN86Bio-activityNot validated for activityPropertiesPurity> 95 % as determined by reducing SDS-PAGE.Endotoxin< 1.0 EU per μg of the protein as determined by the I	Human		
Bio-activityNot validated for activityPropertiesPurity> 95 % as determined by reducing SDS-PAGE.Endotoxin< 1.0 EU per μg of the protein as determined by the I			
Properties   Purity > 95 % as determined by reducing SDS-PAGE.   Endotoxin < 1.0 EU per μg of the protein as determined by the E   Storage Generally, lyophilized proteins are stable for up to 12   °C. Reconstituted protein solution can be stored at 4   reconstituted samples are stable at < -20°C for 3 mon   Shipping This product is provided as lyophilized powder whice   Formulation Lyophilized from a 0.2 μm filtered solution of 20mM   Normally 5% - 8% trehalose, mannitol and 0.01% Two   before lyophilization.   Please refer to the specific buffer information in the p   Please refer to the printed manual for detailed inform

## Background

Choriogonadotropin subunit beta is also known as CG-beta, Chorionic gonadotrophin chain beta. It is a protein that in humans is encoded by the CGB gene. It belongs to the glycoprotein hormones subunit beta family. Choriogonadotropin subunit beta can stimulates the ovaries to synthesize the steroids that are essential for the maintenance of pregnancy.
