Elabscience®

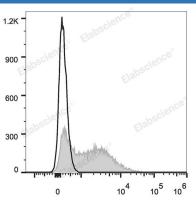

APC Anti-Human CD38 Antibody[HIT2]

Catalog Number: E-AB-F1058E

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description			
Reactivity	Human		
Host	Mouse		
lsotype	Mouse IgG1, κ		
Clone No.	HIT2		
Isotype Control	APC Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792E]		
Conjugation	APC		
Conjugation Information	APC is designed to be excited by the Red (627-640 nm) laser and detected using an optical filter centered near 660 nm (e.g., a 660/20 nm bandpass filter).		
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% sodium azide and 1% BSA.		
Applications	Recommended usage		
FCM	Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.		

Data

Human peripheral blood lymphocytes are stained with APC Anti-Human CD38 Antibody (filled gray histogram). Unstained lymphocytes (empty black histogram) are used as control.

Preparation & Storage		
Storage	Keep as concentrated solution.	
	This product can be stored at 2-8°C for 12 months. Please protected from prolonged exposure to light and do not freeze.	
Shipping	Ice bag	
Antigen Information		
Alternate Names	2'-phospho-ADP-ribosyl cyclase;2'-phospho-cyclic-ADP-ribose transferase;ADP-ribosyl cyclase 1;ADP-ribosyl cyclase/cyclic ADP-ribose hydrolase 1;ADPRC 1;CD38;Cyclic ADP-ribose hydrolase 1;T10;cADPr hydrolase 1	
Uniprot ID	P28907	

For R	esearch	ו Use	Only

Gene ID Background

952

CD38 is a 45 kD type II transmembrane glycoprotein also known as T10. It is an ADPribosyl hydrolase expressed at variable levels on hematopoietic cells and in some nonhematopoietic tissues (such as brain, muscles, and kidney). In humans, it is expressed at high levels on plasma cells and activated T and B cells. By functioning as both a cyclase and a hydrolase, CD38 mediates lymphocyte activation, adhesion, and the metabolism of cADPR and NAADP. CD31 is the ligand of CD38.
