Purified Anti-Human TNF-α Antibody[Adalimumab297.rMAb]

catalog number: **AN007900P**

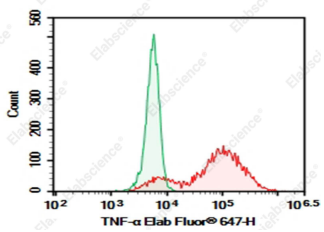

Note: *Centrifuge before opening to ensure complete recovery of vial contents.*

Description

Reactivity	Human
Immunogen	Recombinant Human TNF-alpha protein
Host	Human
Isotype	Human IgG1, κ
Clone	Adalimumab297.rMAb
Purification	>98%, Protein A/G purified
Buffer	Phosphate-buffered solution, pH 7.2, containing 0.05% non-protein stabilizer. Dialyze to completely remove the stabilizer prior to labeling.

Applications	Recommended Dilution
FCM	≤ 0.2 μg per million cells in 100 μL volume

Data

HEK293T cells transfected with pcDNA3.1 plasmid encoding Human TNF-α gene were stained with 0.2 μg Purified Anti-Human TNF-α Antibody[Adalimumab297.rMAb] (Right) and 0.2 μg Human IgG1, κ Isotype Control (Left), followed by Elab Fluor® 647-conjugated Goat Anti-Human IgG Secondary Antibody.

Preparation & Storage

Storage	Store at 4°C valid for 12 months or -20°C valid for long term storage, avoid freeze / thaw cycles.
Shipping	Ice bag

Background

This gene encodes a multifunctional proinflammatory cytokine that belongs to the tumor necrosis factor (TNF) superfamily. This cytokine is mainly secreted by macrophages. It can bind to, and thus functions through its receptors TNFRSF1A/TNFR1 and TNFRSF1B/TNFBR. This cytokine is involved in the regulation of a wide spectrum of biological processes including cell prolifeRation, differentiation, apoptosis, lipid metabolism, and coagulation. This cytokine has been implicated in a variety of diseases, including autoimmune diseases, insulin resistance, and cancer. Knockout studies in mice also suggested the neuroprotective function of this cytokine.
