

VASA Monoclonal Antibody

catalog number: E-AB-48026

Note: *Centrifuge before opening to ensure complete recovery of vial contents.*

Description

Reactivity	Gibel carp
Immunogen	Recombinant Zebrafish VASA protein expressed by E.coli
Host	Mouse
Isotype	Mouse IgG1
Clone	7A11
Purification	Protein A/G Purification
Buffer	PBS with 0.05% Proclin300, 1% protective protein and 50% glycerol, pH7.4

Applications

Recommended Dilution

IF	1:100-1:200
----	-------------

Data

Immunofluorescence of frozen section of male Gibel carp gonads with anti-VASA mouse monoclonal antibody at dilution of 1:100.

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended.

Background

Vasa is an RNA binding protein with an ATP-dependent RNA helicase that is a member of the DEAD box family of proteins. The vasa gene is essential for germ cell development and was first identified in *Drosophila melanogaster*, but has since been found to be conserved in a variety of vertebrates and invertebrates including humans. The Vasa protein is found primarily in germ cells in embryos and adults, where it is involved in germ cell determination and function, as well as in multipotent stem cells, where its exact function is unknown.
