Rat CRP Antibody Pair SetSet

Catalog No. E-KAB-0098 Applications ELISA

Synonyms PTX1, Pentraxin 1

Kit components & Storage

| Title | Specifications | Storage |
|-------------------------------------|-----------------|-----------------------------------|
| Rat CRP Capture Antibody | 1 vial, 100 μ g | Store at -20℃. Avoid freeze/thaw |
| | | cycles. |
| Rat CRP Detection Antibody (Biotin) | 1 vial, 50 μL | Store at -20°C. Avoid freeze/thaw |
| | | cycles. |

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Background

C-reactive protein (CRP) is an evolutionary highly conserved member of the pentraxin superfamily of proteins. CRP consists of five identical subunits with molecular weight 20-30 kDa arranged as a cyclic pentamer. CRP exists in at least two conformationally distinct forms, native pentameric CRP (pCRP) and modified/monomeric CRP (mCRP). CRP plays important roles in inflammatory processes and host responses to infection including promoting agglutination, bacterial capsular swelling, phagocytosis and complement fixation through its Ca2+-dependent binding to phosphorylcholine (PCh). CRP is mainly expressed by hepatocytes and secreted into plasma. The concentration of CRP will increase significantly in plasma during acute phase response to tissue injury, infection or other inflammatory stimuli.
