Recombinant Human Erythropoietin R/EPOR Protein (His Tag)

Catalog Number: PKSH033685

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description		
Species		Human
Source		HEK293 Cells-derived Human Erythropoietin R; EPOR protein Ala25-Pro250, with an C-
		terminal His
Calculated MW		25.9 kDa
Observed MW		28-38 kDa
Accession		P19235
Bio-activity		Not validated for activity
Properties		
Purity		> 95 % as determined by reducing SDS-PAGE.
Endotoxin		< 1.0 EU per µg of the protein as determined by the LAL method.
Storage		Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80
		°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of
		reconstituted samples are stable at $< -20^{\circ}$ C for 3 months.
Shipping		This product is provided as lyophilized powder which is shipped with ice packs.
Formulation		Lyophilized from a 0.2 μ m filtered solution of 20mM Tris-HCl, 8% Trehalose, 3%
		Glycine, 0.05% Tween 80, pH 8.0.
		Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants
		before lyophilization.
		Please refer to the specific buffer information in the printed manual.
Reconstitution		Please refer to the printed manual for detailed information.
Data		
L.C.	Do MK	P

> 95 % as determined by reducing SDS-PAGE.

Background

Erythropoietin (Epo); a glycoprotein produced primarily by the kidney; is the principal factor that regulates erythropoiesis by stimulating the proliferation and differentiation of erythroid progenitor cells. The biological effects of Epo are mediated by the erythropoietin receptor (Epo R). The presence of a soluble form of the Epo R has also been detected on human sera. Recombinant soluble Epo R binds Epo with high affinity and is a potent Epo antagonist.
