A Reliable Research Partner in Life Science and Medicine

# **COX4I1 Monoclonal Antibody**

catalog number: E-AB-22002

Note: Centrifuge before opening to ensure complete recovery of vial contents.

#### Description

Reactivity Human; Mouse; Rat Immunogen Recombinant Protein

HostMouseIsotypeIgGClone2D4

**Purification** Protein A purification

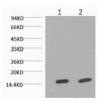

**Buffer** Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer, 0.5% protein

protectant and 50% glycerol.

## **Applications** Recommended Dilution

WB 1:1000-3000
IHC 1:50-300
IF 1:100-1:300

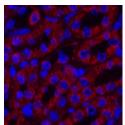

#### Data

1:2000 1:5000

Western Blot analysis of Hela cells using COX4II Monoclonal Antibody at dilution of 1) 1:2000 2) 1:5000.

> Observed-MW:15 kDa Calculated-MW:20 kDa

Negative Control

Immunohistochemistry of paraffin-embedded Rat kidney tissue using COX4I1 Monoclonal Antibody at dilution of 1:200.

Immunofluorescence analysis of Mouse kidney tissue using COX4I1 Monoclonal Antibody at dilution of 1:200.

### Preparation & Storage

Storage Storage Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.

**Shipping** The product is shipped with ice pack, upon receipt, store it immediately at the

temperature recommended.

Cytochrome c oxidase (COX) is the terminal enzyme of the mitochondrial respiratory chain. It is a multi-subunit enzyme complex that couples the transfer of electrons from cytochrome c to molecular oxygen and contributes to a proton electrochemical gradient across the inner mitochondrial membrane. The complex consists of 13 mitochondrial- and nuclear-encoded subunits. The mitochondrially-encoded subunits perform the electron transfer and proton pumping activities. The functions of the nuclear-encoded subunits are unknown but they may play a role in the regulation and assembly of the complex. This gene encodes the nuclear-encoded subunit IV isoform 1 of the human mitochondrial respiratory chain enzyme. It is located at the 3' of the NOC4 (neighbor of COX4) gene in a head-to-head orientation, and shares a promoter with it.
