Mouse ACP3/PAP Antibody Pair Set

Catalog No. E-KAB-0727 Applications ELISA

Synonyms ACPP;5'-NT;ACP-3;ACP3;acid phosphatase,prostate

Kit components & Storage

Title	Specifications	Storage
Mouse ACP3/PAP Capture Antibody	1 vial, 100 μ g	Store at -20℃. Avoid freeze /
		thaw cycles.
Mouse ACP3/PAP Detection Antibody	1 vial, 50 μL	Store at -20°C. Avoid freeze /
(Biotin)		thaw cycles.

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Product Information

Items		Characteristic (E-KAB-0727)		
		Mayor ACD2/DAD Continue Antihody	Mouse ACP3/PAP Detection Antibody	
		Mouse ACP3/PAP Capture Antibody	(Biotin)	
Immunogen	Immunogen	Recombinant Mouse ACP3 protein	Recombinant Mouse ACP3 protein	
Information	Swissprot	Q8CE08		
Product details	Reactivity	Mouse	Mouse	
	Host	Rabbit	Rabbit	
	Conjugation	Unconjugated	Biotin	
	Concentration	0.5mg/mL	/	
	Buffer	PBS with 0.04% Proclin 300, 50%	PBS with 0.04% Proclin 300, 1%	
		glycerol, pH 7.4	protective protein, 50% glycerol, pH	
			7.4	
	Purify	Protein A	Protein A & Antigen Affinity	
	Specificity	Detects Mouse ACP3 in ELISAs.		

For Research Use Only

Applications

Mouse ACP3 Sandwich ELISA Assay:

	Recommended	Reagent	Images
	Concentration/Dilution		
ELISA	0.5-4ug/mL	Mouse ACP3/PAP Capture	
Capture		Antibody	10
			t 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
ELISA	1:1000-1:10000	Mouse ACP3/PAP	Optical Density
Detection		Detection Antibody	0.1
		(Biotin)	
			0.01 100 1000 10000 100000 100000 Mouse ACP3/PAP concentration (pg/mL)
			the state of the s

Note: This standard curve is only for demonstration purposes. A standard curve should be generated for each assay!

Background

ACPP, also known as prostatic acid phosphatase, belongs to the histidine acid phosphatase family. It has phosphotyrosyl phosphatase activity. It is predominantly expressed in the prostate gland, and restricted to gladular and ductal epithelial cells, and mainly in the secreted form. It is also widely expressed in non-prostatic tissues, such as bladder, kidney, pancreas, lung, cervix, testis, and ovary, as a type I transmembrane protein with N-terminal phosphatase activity. The expression of ACPP correlates with prostate cell proliferation. High levels of ACPP leads to slow cell growth. Though the level of ACPP in the circulation is increased in prostate cancer patients, its level and activity are reduced in prostate cancer cells. ACPP serves as a tumor suppressor. Reduced ACPP levels result in hyperphosphorylation of HER-2 (human epidermal growth factor receptor-2), activating downstream MAPK signaling, prostate cancer progression and androgen-independent growth. In addition, ACPP dephosphorylates ErbB-2, blocking downstream ERK1/2 and AKT signaling and tumorigenicity.
