Elabscience®

TXNDC12 Polyclonal Antibody

catalog number: E-AB-19142

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description		
Reactivity	Human;Mouse;Rat	
Immunogen	Fusion protein of human TXNDC12	
Host	Rabbit	
Isotype	IgG	
Purification	Antigen affinity purification	
Conjugation	Unconjugated	
Buffer	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.	
Applications	Recommended Dilution	
IHC	1:50-1:200	
Data		
	y of paraffin-embedded Human	Immunohistochemistry of paraffin-embedded Human liver
colorectal cancer tiss	ue using TXNDC12 Polyclonal	cancer tissue using TXNDC12 Polyclonal Antibody at
colorectal cancer tiss Antibody at	• •	•
colorectal cancer tiss Antibody at Preparation & Storage	ue using TXNDC12 Polyclonal dilution of 1:70(×200)	cancer tissue using TXNDC12 Polyclonal Antibody at dilution of 1:70(×200)
colorectal cancer tiss Antibody at	ue using TXNDC12 Polyclonal dilution of 1:70(×200) Store at -20°C Valid for 1	cancer tissue using TXNDC12 Polyclonal Antibody at

Background

This gene encodes a member of the thioredoxin superfamily. Members of this family are characterized by a conserved active motif called the thioredoxin fold that catalyzes disulfide bond formation and isomerization. This protein localizes to the endoplasmic reticulum and has a single atypical active motif. The encoded protein is mainly involved in catalyzing native disulfide bond formation and displays activity similar to protein-disulfide isomerases. This protein may play a role in defense against endoplasmic reticulum stress. Alternate splicing results in both coding and non-coding variants.
