

A Reliable Research Partner in Life Science and Medicine

Elab Fluor® Violet 610 Anti-Mouse CD86 Antibody[GL-1]

Catalog Number: E-AB-F0994UT

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Descri	
LIGECTI	ntion
DESUL	

Reactivity Mouse Rat Host

Isotype Rat IgG2a, ĸ

Clone No. GL-1

Isotype Control Elab Fluor® Violet 610 Rat IgG2a, κ Isotype Control[2A3] [Product E-AB-F09833T]

Conjugation Elab Fluor® Violet 610

Conjugation Information Elab Fluor® Violet 610 is designed to be excited by the violet laser (405 nm) and detected

using an optical filter centered near 613 nm (e.g., a 615/20 nm bandpass filter).

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein

protectant.

Applications Recommended usage

FCM Each lot of this antibody is quality control tested by flow cytometric analysis. Please

> check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1 μg/10⁶ cells

in 100 µL volume].

Preparation & Storage

Storage Keep as concentrated solution.

This product can be stored at 2-8°C for 12 months. Please protected from prolonged

exposure to light and do not freeze.

Shipping Ice bag

Antigen Information

Alternate Names Activation B7-2 antigen; Cd86; ETC-1; Early T-cell costimulatory molecule 1; T-lymphocyte

activation antigen CD86

Uniprot ID P42082 Gene ID 12524

Background CD86 is an 80 kD immunoglobulin superfamily member also known as B7-2, B70, and

> Ly-58. CD86 is expressed on activated B and T cells, macrophages, dendritic cells, and astrocytes. CD86, along with CD80, is a ligand of CD28 and CD152 (CTLA-4). CD86 is expressed earlier in the immune response than CD80. CD86 has also been shown to be involved in immunoglobulin class-switching and triggering of NK cellmediated cytotoxicity. CD86 binds to CD28 to transduce co-stimulatory signals for T cell activation, proliferation, and cytokine production. CD86 can also bind to CD152, also

known as CTLA-4, to deliver an inhibitory signal to T cells.
