CTNNBL1 Polyclonal Antibody

catalog number: **E-AB-14901**

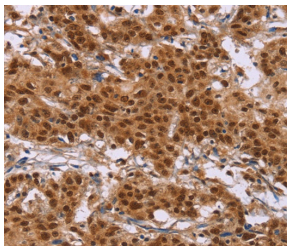

Note: *Centrifuge before opening to ensure complete recovery of vial contents.*

Description

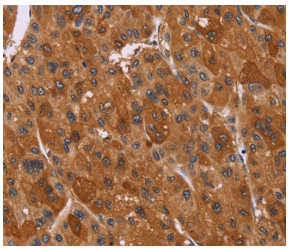

Reactivity	Human;Mouse;Rat
Immunogen	Recombinant protein of human CTNNBL1
Host	Rabbit
Isotype	Rabbit IgG
Purification	Affinity purification
Buffer	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.

Applications	Recommended Dilution
IHC	1:100-1:300

Data

Immunohistochemistry of paraffin-embedded Human gastric cancer tissue using CTNNBL1 Polyclonal Antibody at dilution 1:50

Immunohistochemistry of paraffin-embedded Human liver cancer tissue using CTNNBL1 Polyclonal Antibody at dilution 1:50

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack,upon receipt,store it immediately at the temperature recommended.

Background

The protein encoded by this gene is a component of the pre-mRNA-processing factor 19-cell division cycle 5-like (PRP19-CDC5L) protein complex, which activates pre-mRNA splicing and is an integral part of the spliceosome. The encoded protein is also a nuclear localization sequence binding protein, and binds to activation-induced deaminase and is important for antibody diversification. This gene may also be associated with the development of obesity. Alternative splicing results in multiple transcript variants. A pseudogene of this gene has been defined on the X chromosome.
