Shipping	The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended.

Background

The ZBTB6 protein contains a conserved N-terminal domain known as the POZ domain that inhibits DNA binding. Sequence analysis predicted that the 424-amino acid protein contains 4 C-terminal zinc finger motifs and an N-terminal domain of 120 amino acids found in many different zinc finger proteins and a group of non-zinc finger poxvirus proteins.
