

## CD200 Polyclonal Antibody(Capture/Detector)

catalog number: AN003030P

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

### Description

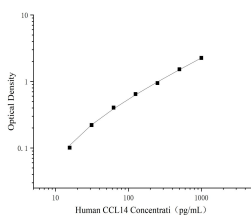

<b>Reactivity</b>	Human
<b>Immunogen</b>	Recombinant Human CD200 Protein expressed by Mammalian
<b>Host</b>	Rabbit
<b>Isotype</b>	Rabbit IgG
<b>Purification</b>	Antigen Affinity Purification
<b>Conjugation</b>	Unconjugated
<b>Buffer</b>	Phosphate buffered solution, pH 7.2, containing 0.05% proclin 300.

### Applications

### Recommended Dilution

<b>ELISA Capture</b>	2-8 µg/mL
<b>ELISA Detector</b>	0.1-0.4 µg/mL

### Data

Sandwich ELISA-Recombinant Human CD200 Protein standard curve. Background subtracted standard curve using Anti-CD200 antibody(AN003030P)(Capture), Anti-CD200 antibody(AN003030P)(Detector). The reference range value is 0.156-10ng/mL for human.

### Preparation & Storage

<b>Storage</b>	Store at 4°C valid for 12 months or -20°C valid for long term storage, avoid freeze / thaw cycles.
<b>Shipping</b>	The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended.

### Background

CD200 (OX2) and CD200R (OX2R) are membrane glycoprotein members of the Ig superfamily. CD200 is expressed by a range of cells, including neurons, epithelial cells, endothelial cells, fibroblasts, and lymphoid cells, while its receptor, CD200R, is found on myeloid and T cells. Interaction between CD200 and CD200R downregulates macrophage function and plays a role in immunosuppression and regulation of anti-tumor immune responses.
