

Recombinant Phospho-YAP1 (Ser127) Monoclonal Antibody

catalog number: **AN302080L**

Note: *Centrifuge before opening to ensure complete recovery of vial contents.*

Description	
Reactivity	Human
Immunogen	phosphorylated human YAP1 (Ser1270) peptide
Host	Rabbit
Isotype	Rabbit IgG
Clone	C311701
Purification	Protein A purified
Buffer	PBS, 50% glycerol, 0.05% Proclin 300, 0.05% protein protectant.
Applications	
WB	1:500-1:2000
IHC	1:100-1:200
IF	1:50
FCM	1:50-1:100
Data	

Western Blot with Phospho-YAP1 (Ser127) Monoclonal Antibody at dilution of 1:2000. (-): HeLa, (+): HeLa+Okadaic A+ calyculin A (100 nM, 60 min)
Observed-MW: 70- 100 kDa
Calculated-MW: 54 kDa

Immunohistochemistry of paraffin-embedded Human colon cancer using Phospho-YAP1 (Ser127) Monoclonal Antibody at dilution of 1:200.

Western Blot with Phospho-YAP1 (Ser127) Monoclonal Antibody at dilution of 1:2000. Lane 1: PANC-1
Observed-MW: 70- 100 kDa
Calculated-MW: 54 kDa

Immunofluorescent analysis of (4% Paraformaldehyde) fixed MCF-7 cells using anti-Phospho-YAP1 (Ser127) Monoclonal Antibody at dilution of 1:50.

Rev. V1.2

Flow cytometric analysis of human Phospho-YAP1 (Ser127) expression on PANC-1 cells. Cells were stained with purified anti-Human Phospho-YAP1 (Ser127), then a Alexa Fluor 488-conjugated second step antibody. The histogram were derived from events with the forward and side light-scatter characteristics of intact cells.

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	Ice bag

Background

Transcriptional regulator which can act both as a coactivator and a corepressor and is the critical downstream regulatory target in the Hippo signaling pathway that plays a pivotal role in organ size control and tumor suppression by restricting proliferation and promoting apoptosis. The core of this pathway is composed of a kinase cascade wherein MST1/MST2, in complex with its regulatory protein SAV1, phosphorylates and activates LATS1/2 in complex with its regulatory protein MOB1, which in turn phosphorylates and inactivates YAP1 oncoprotein. Plays a key role to control cell proliferation in response to cell contact. Phosphorylation of YAP1 by LATS1/2 inhibits its translocation into the nucleus to regulate cellular genes important for cell proliferation, cell death, and cell migration.
