## APC Anti-Mouse CD22 Antibody[Cy34.1]

Catalog Number: E-AB-F1021UE

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Reactivity Mouse Mouse Host

Isotype Mouse IgG1, ĸ

Clone No. Cy34.1

APC Mouse IgG1, k Isotype Control[MOPC-21] [Product E-AB-F09793E] Isotype Control

APC Conjugation

**Conjugation Information** APC is designed to be excited by the Red (627-640 nm) laser and detected using an

optical filter centered near 660 nm (e.g., a 660/20 nm bandpass filter).

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% sodium azide and 1% BSA.

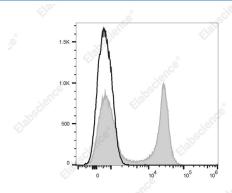

#### **Applications** Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. Please **FCM** 

> check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1  $\mu g/10^6$  cells

in 100 µL volume].

#### Data

C57BL/6 murine splenocytes are stained with APC Anti-Mouse CD22 Antibody[Cy34.1] (filled gray histogram) or APC Mouse IgG1, κ Isotype Control (empty black histogram).

#### **Preparation & Storage**

Keep as concentrated solution. Storage

This product can be stored at 2-8°C for 12 months. Please protected from prolonged

exposure to light and do not freeze.

**Shipping** Ice bag

#### **Antigen Information**

**Alternate Names** Siglec2;B-cell receptor CD22;B-lymphocyte cell adhesion molecule;BL-CAM;CD22;

#### **Background**

The Cy34.1 monoclonal antibody specifically binds to the B-lymphocyte differentiation antigen CD22 on strains having the Lyb-8.2 alloantigen (e.g., A, BALB/c, CBA, C3H/He, C57BL, C57L, C58, SJL, SWR, but not AKR, DBA/1, DBA/2, NZB, PL). CD22 is expressed at high levels on mature peripheral B lymphocytes (follicular and marginal zone), B-1 cells (CD5+ B cells), and plasma cells. It is a member of the lg gene superfamily and associates with the B-cell antigen receptor. Its sialic acid- binding immunoglobulin-like lectin (siglec) extracellular region mediates B-cell adhesion to ligands on endothelial cells in the bone marrow. Its intracellular domain is phosphorylated after cross-linking of antigen receptor or MHC class II antigen. It is involved in negative regulation of B-cell activation and protection from autoimmunity. B-cell proliferative responses to LPS or anti-mouse lg  $\mu$  chain are augmented in the presence of Cy34.1 mAb.
