Elabscience®

TIMP2 Polyclonal Antibody

catalog number: E-AB-60338

Note: Centrifuge before opening to ensure complete recovery of vial contents.

1:50-1:200

Description	
Reactivity	Human;Mouse;Rat
Immunogen	A synthetic peptide of human TIMP2 (NP_003246.1).
Host	Rabbit
Isotype	IgG
Purification	Affinity purification
Buffer	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.
Applications	Recommended Dilution
WB	1:500-1:2000

IF

Data

Western blot analysis of extracts of various cell lines using TIMP2 Polyclonal Antibody at dilution of 1:1000.

> Observed-MW:26 kDa Calculated-MW:24 kDa

Immunofluorescence analysis of C6 cells using TIMP2 Polyclonal Antibody at dilution of 1:100. Blue: DAPI for nuclear staining.

Immunofluorescence analysis of U-2 OS cells using TIMP2 Polyclonal Antibody at dilution of 1:100. Blue: DAPI for

nuclear staining.

Background

For Research Use Only

Elabscience®

This gene is a member of the TIMP gene family. The proteins encoded by this gene family are natural inhibitors of the matrix metalloproteinases, a group of peptidases involved in degradation of the extracellular matrix. In addition to an inhibitory role against metalloproteinases, the encoded protein has a unique role among TIMP family members in its ability to directly suppress the proliferation of endothelial cells. As a result, the encoded protein may be critical to the maintenance of tissue homeostasis by suppressing the proliferation of quiescent tissues in response to angiogenic factors, and by inhibiting protease activity in tissues undergoing remodelling of the extracellular matrix.
