PE/Cyanine7 Anti-Mouse TCRβ Antibody[H57-597]

Catalog Number: E-AB-F1123UH

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Descri	

Reactivity Mouse

Host Armenian Hamster Isotype Armenian Hamster IgG

Clone No. H57-597

PE/Cyanine7 Armenian Hamster IgG Isotype Control[PIP] [Product E-AB-F09853H] Isotype Control

PE/Cyanine 7 Conjugation

Conjugation Information PE/Cyanine7 is designed to be excited by the Blue (488 nm), Green (532 nm) and

yellow-green (561 nm) lasers and detected using an optical filter centered near 775 nm

(e.g., a 780/60 nm bandpass filter).

Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein Storage Buffer

protectant.

Applications

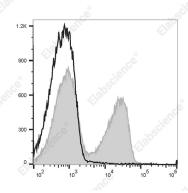

Recommended usage

FCM

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1 $\mu g/10^6$ cells

in 100 µL volume].

Data

C57BL/6 murine splenocytes are stained with PE/Cyanine7 Anti-Mouse TCRβ Antibody[H57-597 (HB218)] (filled gray histogram) or PE/Cyanine7 Armenian Hamster IgG Isotype Control (empty black histogram).

Preparation & Storage

Storage Keep as concentrated solution.

This product can be stored at 2-8°C for 12 months. Please protected from prolonged

exposure to light and do not freeze.

Shipping Ice bag

Antigen Information

Alternate Names TCR-ββ-TCR;TCR-β chain

Gene ID 21577

Background

T cell receptor (TCR) is a heterodimer consisting of an α and a β chain (TCR α/β) or a γ and a δ chain (TCR γ/δ). TCR- β is a member of the immunoglobulin superfamily and a component of the CD3/TCR complex (along with TCR- α). It is expressed on α/β TCR-bearing T cells and thymocytes. The CD3/TCR complex plays a key role in antigen recognition, signal transduction, and T cell activation.
