Elabscience®

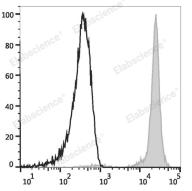

Elab Fluor[®] Red 780 Anti-Human CD45 Antibody[HI30]

Catalog Number: E-AB-F1137S

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description				
Reactivity	Human			
Host	Mouse			
lsotype	Mouse IgG1, κ			
Clone No.	HI30			
Isotype Control	Elab Fluor [®] Red 780 Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792S]			
Conjugation	Elab Fluor [®] Red 780			
Conjugation Information	Elab Fluor [®] Red 780 is designed to be excited by the Red (627-640 nm) laser and detected using an optical filter centered near 770 nm (e.g., a 780/60 nm bandpass filter).			
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.			
Applications	Recommended usage			
FCM	Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.			

Data

Human peripheral blood lymphocytes are stained with Elab

Fluor[®] Red 780 Anti-Human CD45 Antibody (filled gray histogram) or Elab Fluor[®] Red 780 Mouse IgG1, κ Isotype Control (empty black histogram).

Preparation & Storag	ge			
Storage	Keep as concentrated solution.			
	This product can be stored at 2-8°C for 12 months. Please protected from prolonged			
	exposure to light and do not freeze.			
Shipping	Ice bag			
Antigen Information				
Alternate Names	CD45;L-CA;Ly-5;Ptprc;Receptor-type tyrosine-protein phosphatase C;T200			
Uniprot ID	P08575			
Gene ID	5788

Background

CD45 is a 180 - 240 kD single chain type I membrane glycoprotein also known as leukocyte common antigen (LCA) and T200. It is a tyrosine phosphatase expressed on the plasma membrane of all hematopoietic cells, except erythrocytes or platelets. CD45 is a signaling molecule that regulates a variety of cellular processes including cell growth, differentiation, cell cycle, and oncogenic transformation. CD45 plays a critical role in T and B cell antigen receptor-mediated activation by dephosphorylating substrates including p56Lck, p59Fyn, and other Src family kinases. CD45 noncovalently associates with lymphocyte phosphatase-associated phosphoprotein (LPA P) on T and B lymphocytes. CD45 has been reported to bind galectin-1 and to be associated with several other cell surface antigens including CD1, CD2, CD3, and CD4
