A Reliable Research Partner in Life Science and Medicine

Recombinant Human GAS6 (C-6His)

Catalog Number: PKSH033928

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Species Human

Source HEK293 Cells-derived Human GAS6 protein Ala31-Ala678, with an C-terminal His

 Mol_Mass
 72.7 kDa

 Accession
 Q14393-2

Bio-activity Immobilized Human AXL-His at 10μg/ml (100 μl/well) can bind Human GAS6-His:

Biotinylated by NHS-biotin prior to testing. The ED50 of Recombinant Human GAS6-

His is 0.04466 ug/ml.

Properties

Purity > 95 % as determined by reducing SDS-PAGE.

Endotoxin < 1.0 EU per µg of the protein as determined by the LAL method.

Storage Store at < -20°C, stable for 6 months. Please minimize freeze-thaw cycles.

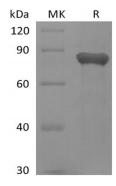

Shipping This product is provided as liquid. It is shipped at frozen temperature with blue ice/gel

packs. Upon receipt, store it immediately at < - 20°C.

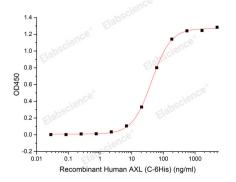

Formulation Supplied as a 0.2 μm filtered solution of PBS, 10% Glycerol, pH 7.4.

Reconstitution Not Applicable

Data

> 95 % as determined by reducing SDS-PAGE.

Immobilized Human AXL-His at $10\mu g/ml$ ($100 \mu l/well$) can bind Human GAS6-His: Biotinylated by NHS-biotin prior to testing. The ED50 of Recombinant Human GAS6-His is $0.04466 \mu g/ml$.

Background

GAS6 (Growth arrest-specific protein 6) is also known as AXL receptor tyrosine kinase ligand, AXLLG, is a multimodular protein that is up-regulated by a wide variety of cell types in response to growth arrest. Gas6 binds and induces signaling through the receptor tyrosine kinases Axl, Dtk, and Mer whose signaling is implicated in cell growth and survival, cell adhesion and cell migration. GAS6/AXL signaling plays a role in various processes such as endothelial cell survival during acidification by preventing apoptosis, optimal cytokine signaling during human natural killer cell development, hepatic regeneration, gonadotropin-releasing hormone neuron survival and migration, platelet activation, or regulation of thrombotic responses.
