

A Reliable Research Partner in Life Science and Medicine

# PE/Cyanine 5 Anti-Human CD35 Antibody [E11]

Catalog Number: E-AB-F1062G

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Reactivity Human Mouse Host

Isotype Mouse IgG1, ĸ

Clone No. E11

PE/Cyanine5 Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792G] Isotype Control

PE/Cyanine 5 Conjugation

**Conjugation Information** PE/Cyanine5 is designed to be excited by the Blue (488 nm), Green (532 nm) and

yellow-green (561 nm) lasers and detected using an optical filter centered near 670 nm

(e.g., a 690/50 nm bandpass filter).

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein

protectant.

## **Applications**

## Recommended usage

**FCM** 

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 µL of antibody per test (million cells in 100 μL staining volume or per 100 μL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

# **Preparation & Storage**

Storage Keep as concentrated solution.

This product can be stored at 2-8°C for 12 months. Please protected from prolonged

exposure to light and do not freeze.

**Shipping** Ice bag

#### **Antigen Information**

**Alternate Names** C3BR;C3b/C4b receptor;CD35;CR1;Complement receptor type 1

**Uniprot ID** P17927 Gene ID 1378

**Background** CD35 is a type I single chain of glycoprotein, also known as C3b/C4b receptor,

Complement Receptor type 1 or CR1. Four molecular weight allotypes (160kD, 190kD,

220kD, and 250kD) have been described. CD35 is expressed on granulocytes,

monocytes, B cells, erythrocytes, and follicular dendritic cells, as well as subsets of NK and T cells. CD35 binds complement C3b, C4b, or iC3, and iC4, and plays important roles in both innate and adoptive immune response via mediating phagocytosis by granulocytes and monocytes. CD35 has also been reported to inhibit T-cell

proliferation.
