Hank's Balanced Salt Solution (HBSS), with calcium, magnesium, phenol red

Cat. No.: PB180324

Size: 500mL

General Information

Product Form Liquid Concentration 1× pН 7.0 - 7.41000 mg/L **D-Glucose** 350 mg/L NaHCO₃ Phenol red 10 mg/L CaCl₂ (anhydrous) 140 mg/L MgCl₂•6H₂O 100 mg/L MgSO₄•7H₂O 100 mg/L

Shipping Room Temperature

2-30°C

Expiration date 36 months

Background

Storage

Balanced Salt Solution (Physiological Solution) have the properties of buffer solution (regulate pH), normal saline (maintain osmotic pressure) and culture medium (provide nutrition). It can meet the basic needs of survival and metabolism of tissues, organs or cells in vitro. A small amount of phenolic red was added to some equilibrium salt solutions to indicate the pH change of the solution.

Hank's Balanced Salt Solution (HBSS) is one of the commonly used phosphate buffers in cell separation or culture. The main components are NaCl, KCl, KH₂PO₄, Na₂HPO₄, NaHCO₃, CaCl₂, MgCl₂, MgSO₄ and glucose. HBSS is often used to rinse tissue or cells, to transport cells or tissues, to prepare other reagents, to dilute the cells when counting the cells.

Notes

- 1. This product is for research use only.
- This product is sterilized by 0.1 µm filtration.
- 3. It is necessary to pay attention to the aseptic operation and avoid the contamination.
