

## Hank's Balanced Salt Solution (HBSS), with calcium, magnesium, phenol red

Cat. No. : PB180324

Size : 500mL

### General Information

|                                      |                  |
|--------------------------------------|------------------|
| Product Form                         | Liquid           |
| Concentration                        | 1×               |
| pH                                   | 7.0-7.4          |
| D-Glucose                            | 1000 mg/L        |
| NaHCO <sub>3</sub>                   | 350 mg/L         |
| Phenol red                           | 10 mg/L          |
| CaCl <sub>2</sub> (anhydrous)        | 140 mg/L         |
| MgCl <sub>2</sub> ·6H <sub>2</sub> O | 100 mg/L         |
| MgSO <sub>4</sub> ·7H <sub>2</sub> O | 100 mg/L         |
| Storage                              | 2-30°C           |
| Shipping                             | Room Temperature |
| Expiration date                      | 36 months        |

### Background

Balanced Salt Solution (Physiological Solution) have the properties of buffer solution (regulate pH), normal saline (maintain osmotic pressure) and culture medium (provide nutrition). It can meet the basic needs of survival and metabolism of tissues, organs or cells in vitro. A small amount of phenolic red was added to some equilibrium salt solutions to indicate the pH change of the solution.

Hank's Balanced Salt Solution (HBSS) is one of the commonly used phosphate buffers in cell separation or culture. The main components are NaCl, KCl, KH<sub>2</sub>PO<sub>4</sub>, Na<sub>2</sub>HPO<sub>4</sub>, NaHCO<sub>3</sub>, CaCl<sub>2</sub>, MgCl<sub>2</sub>, MgSO<sub>4</sub> and glucose. HBSS is often used to rinse tissue or cells, to transport cells or tissues, to prepare other reagents, to dilute the cells when counting the cells.

### Notes

1. This product is only used for scientific research or further research, not for diagnosis and treatment.
2. This product is sterilized by 0.1 μm filtration.
3. It is necessary to pay attention to the aseptic operation and avoid the contamination.
