

## Recombinant Insulin Monoclonal Antibody

catalog number: AN300052P

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

### Description

Reactivity	Human
Immunogen	Recombinant Human Insulin Protein
Host	Rabbit
Isotype	IgG
Clone	A1162
Purification	Protein A
Buffer	0.2 µm filtered solution in PBS

### Applications

### Recommended Dilution

IHC-P	1:200-1:1000
-------	--------------

### Data

Immunohistochemistry of paraffin-embedded human pancreas using Insulin Monoclonal Antibody at dilution of 1:500.

### Preparation & Storage

Storage	This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Avoid repeated freeze-thaw cycles.
Shipping	Ice bag

### Background

After removal of the precursor signal peptide, proinsulin is post-translationally cleaved into three peptides: the B chain and A chain peptides, which are covalently linked via two disulfide bonds to form insulin, and C-peptide. Binding of insulin to the insulin receptor (INSR) stimulates glucose uptake. A multitude of mutant alleles with phenotypic effects have been identified. There is a read-through gene, INS-IGF2, which overlaps with this gene at the 5' region and with the IGF2 gene at the 3' region. Alternative splicing results in multiple transcript variants.
