Elabscience®

APCS Polyclonal Antibody

catalog number: E-AB-67395

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description		
Reactivity	Human;Mouse;Rat	
Immunogen	Recombinant fusion protein of human APCS (NP_001630.1).	
Host	Rabbit	
Isotype	IgG	
Purification	Affinity purification	
Buffer	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.	
Applications	ons Recommended Dilution	
IHC	1:50-1:100	
Data		
and a state	and the second	B Carlo Barrow Contractor
•	of paraffin-embedded Rat spleen	• •
•	Antibody at dilution of 1:100 (40x	using APCS Polyclonal Antibody at dilution of 1:100 (40x

Background

The protein encoded by this gene is a glycoprotein, belonging to the pentraxin family of proteins, which has a characteristic pentameric organization. These family members have considerable sequence homology which is thought to be the result of gene duplication. The binding of the encoded protein to proteins in the pathological amyloid crossbeta fold suggests its possible role as a chaperone. This protein is also thought to control the degradation of chromatin. It has been demonstrated that this protein binds to apoptotic cells at an early stage, which raises the possibility that it is involved in dealing with apoptotic cells in vivo.
