AF/LE Purified Anti-Human CD11b Antibody[ICRF44]

catalog number: E-AB-F11460

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Reactivity	Human
Immunogen	Recombinant Human CD11b protein
Host	Mouse
Isotype	Mouse IgG1, κ
Clone	ICRF44
Purification	>98%, Protein A/G purified
Buffer	Sterile PBS, pH 7.2. \leq 1.0 EU per mg of the antibody as determined by the LAL method

Applications	Recommended Dilution
FCM	$2 \ \mu g/mL(1 \times 10^5 - 5 \times 10^5 \text{ cells})$

Human peripheral blood monocytes were stained with 0.2 μg
AF/LE Purified Anti-Human CD11b Antibody[ICRF44]
(Right) and 0.2 μg Mouse IgG1, κ Isotype Control (Left),
followed by APC-conjugated Goat Anti-Mouse IgG
Secondary Antibody, then anti-Human CD14 FITCconjugated Monoclonal Antibody.

Preparation & Storage	
Storage	Store at 4°C valid for 12 months or -20°C valid for long term storage, avoid freeze / thaw cycles. This preparation contains no preservatives, thus it should be handled under aseptic conditions.
Shipping	Ice bag
Background	

Human ITGAM (Integrin alpha M subunit) is a 127kDa (predicted) glycoprotein, a member of the Integrin family of proteins. The Integrin family proteins are heterodimeric transmembrane receptors composed of an alpha and a beta subunit. The Integrin alpha M subunit, also known as MAC-1 alpha subunit or CD11b, combines with the Integrin beta 2 subunit (CD18) to form the non-covalent heterodimer Integrin alpha M/ beta 2, also known as MAC-1 and complement receptor type 3 (CR3).
