

Recombinant OLR1/LOX1 Monoclonal Antibody

catalog number: AN301759L

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity	Human;
Immunogen	Recombinant human OLR1/LOX1 fragment
Host	Rabbit
Isotype	IgG, κ
Clone	A467
Purification	Protein A purified
Buffer	PBS, 50% glycerol, 0.05% Proclin 300, 0.05% protein protectant.

Applications	Recommended Dilution
--------------	----------------------

WB	1:1000-1:5000
IF	1:50
FCM	1:50-1:100

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	Ice bag

Background

This protein is a low density lipoprotein receptor that belongs to the C-type lectin superfamily. It is regulated through the cyclic AMP signaling pathway. The encoded protein binds, internalizes and degrades oxidized low-density lipoprotein. This protein may be involved in the regulation of Fas-induced apoptosis. This protein may play a role as a scavenger receptor. Mutations of this gene have been associated with atherosclerosis, risk of myocardial infarction, and may modify the risk of Alzheimer's disease. Alternate splicing results in multiple transcript variants. Diseases associated with OLR1 include Myocardial Infarction and Chlamydia Pneumonia. Among its related pathways are Innate Immune System and Response to elevated platelet cytosolic Ca^{2+} . Gene Ontology (GO) annotations related to this gene include carbohydrate binding and low-density lipoprotein particle receptor activity.
