

A Reliable Research Partner in Life Science and Medicine

Recombinant Phospho-STAT3 (Ser727) Monoclonal Antibody

catalog number: AN301146L

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Reactivity Human; Mouse; Rat

Immunogen A synthetic peptide corresponding to residues around (Ser727) of Human Phospho-

STAT3

HostRabbitIsotypeIgG,κCloneB905PurificationProtein A

Buffer PBS, 50% glycerol, 0.05% Proclin 300, 0.05% protein protectant.

Applications	Recommended Dilution
IHC	1:400-1:1000

WB 1:2000-1:10000

Data

Western Blot with Recombinant Phospho-STAT3 (Ser727) Monoclonal Antibody at dilution of 1:1000 dilution. Lane A:

Immunohistochemistry of paraffin-embedded human brain using Recombinant Phospho-STAT3 (Ser727) Monoclonal Antibody at dilution of 1:200.

A431 serum.

Observed-MW:88 kDa

Calculated-MW:88 kDa

Preparation & Storage

Storage Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.

Shipping Ice bag

Background

The protein encoded by this gene is a member of the STAT protein family. In response to cytokines and growth factor s, STAT family members are phosphorylated by the receptor associated kinases, and then form homo- or heterodimers that translocate to the cell nucleus where they act as transcription activators. This protein is activated through phosphorylation in response to various cytokines and growth factors including IFNs, EGF, IL5, IL6, HGF, LIF and BMP2. This protein mediates the expression of a variety of genes in response to cell stimuli, and thus plays a key role in many cellular processes such as cell growth and apoptosis. The small GTPase Rac1 has been shown to bind and regulate the activity of this protein. PIAS3 protein is a specific inhibitor of this protein.
