Elabscience®

CASP1 Polyclonal Antibody

catalog number: E-AB-18207

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description			
Reactivity	Human	Human	
Immunogen	Fusion protein of human	Fusion protein of human CASP1	
Host	Rabbit		
Isotype	IgG	IgG	
Purification	Antigen affinity purificat	Antigen affinity purification	
Conjugation	Unconjugated	Unconjugated	
Buffer	Phosphate buffered solut	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.	
Applications	Recommended Dilution	Recommended Dilution	
WB	1:1000-1:4000	1:1000-1:4000	
IHC	1:25-1:100	1:25-1:100	
Data			
Western blot analysis of Hela Antibody at d	ilution of 1:1000	Immunohistochemistry of paraffin-embedded Human pancra at ic cancer tissue using CASP1 Polyclonal Antibody at dilution of 1:25(x200)	
Observed-MW:Refer to figures Calculated-MW:45 kDa		dilution of 1:25(×200)	
	-1VI VV :45 KDa		
Preparation & Storage			
Storage Shipping	The product is shipped w	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles. The product is shipped with ice pack,upon receipt,store it immediately at the temperature recommended.	

Background

This gene encodes a protein which is a member of the cysteine-aspartic acid protease (caspase) family. Sequential activation of caspases plays a central role in the execution-phase of cell apoptosis. Caspases exist as inactive proenzymes which undergo proteolytic processing at conserved aspartic residues to produce 2 subunits, large and smal l, that dimerize to form the active enzyme. This gene was identified by its ability to proteolytically cleave and activate the inactive precursor of interleukin-1, a cytokine involved in the processes such as inflammation, septic shock, and wound healing. This gene has been shown to induce cell apoptosis and may function in various developmental stages. Studies of a similar gene in mouse suggest a role in the pathogenesis of Huntington disease. Alternative splicing results in transcript variants encoding distinct isoforms.
