Elabscience Biotechnology Co., Ltd.

AF/LE Purified Anti-Human CD279/PD-1 Antibody[J110]

Catalog Number: GF12130

Note: Centrifuge before opening to ensure complete recovery of vial contents.

-		-	
	escri		Λn
			UI

Reactivity Human

Immunogen Recombinant Human CD279/PD-1 protein

Host Mouse

Isotype Mouse IgG1, κ

Clone J110

Purification >98%, Protein A/G purified

Conjugation None (AF/LE)

Buffer Sterile PBS, pH 7.2. < 1.0 EU per mg of the antibody as determined by the

LAL method.

Applications	Recommended Dilution
FCM	$2 \mu g/mL(0.5 \times 10^6 - 1 \times 10^6 \text{ cells})$

Preparation & Storage

Storage Store at 4°C valid for 12 months or -20°C valid for long term storage, avoid

freeze / thaw cycles. This preparation contains no preservatives, thus it

should be handled under as eptic conditions.

Ice bag

Background

Shipping

Programmed cell death 1 (PD-1), also known as CD279, is a 55 kD member of the immunoglobulin superfamily. CD279 contains the immunoreceptor tyrosine-based inhibitory motif (ITIM) in the cytoplasmic region and plays a key role in peripheral tolerance and autoimmune disease. CD279 is expressed predominantly on activated T cells, B cells, and myeloid cells. PD-L1 and PD-L2 are ligands of CD279 (PD-1) and are members of the B7 gene family. Evidence suggests overlapping functions for these two PD-1 ligands and their constitutive expression on some normal tissues and upregulation on activated antigen-presenting cells. Interaction of CD279 ligands results in inhibition of T cell proliferation and cytokine secretion.
