Elabscience®

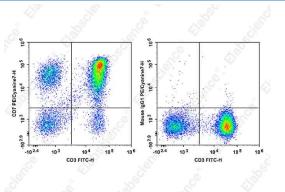

PE/Cyanine7 Anti-Human CD7 Antibody[HIT7]

Catalog Number: E-AB-F1315H

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description			
Reactivity	Human		
Host	Mouse		
lsotype	Mouse IgG1, κ		
Clone No.	HIT7		
Isotype Control	PE/Cyanine7 Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB-F09792H]		
Conjugation	PE/Cyanine 7		
Conjugation Information	PE/Cyanine7 is designed to be excited by the Blue (488 nm), Green (532 nm) and yellow-green (561 nm) lasers and detected using an optical filter centered near 775 nm (e.g., a 780/60 nm bandpass filter).		
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.		
Applications	Recommended usage		
FCM	Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 µL of antibody per test (million cells in 100 µL staining volume or per 100 µL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.		

Human peripheral blood lymphocytes are stained with FITC Anti-Human CD3 Antibody and PE/Cyanine7 Anti-Human CD7 Antibody[HIT7] (Left). Lymphocytes are stained with FITC Anti-Human CD3 Antibody and PE/Cyanine7 Mouse IgG1, κ Isotype Control (Right).

Preparation & Storage		
Storage	Keep as concentrated solution.	
	This product can be stored at 2-8°C for 12 months. Please pr exposure to light and do not freeze.	rotected from prolonged
Shipping	Ice bag	
Antigen Information		
Alternate Names	CD7;GP40;T-cell antigen CD7;T-cell leukemia antigen;T-cell surface antigen Leu-9; TP41

CD7 is a 40 kD type I transmembrane glycoprotein also known as gp40. It is a member of the immunoglobulin superfamily found on T cells, NK cells, thymocytes, hematopoietic progenitors, and monocytes (weakly). CD7 is also expressed on acute lymphocytic leukemia (ALL) and some acute myeloid leukemia (AML) cells. CD7 crosslinking induces a calcium flux in T lymphocytes, presumably as a result of cytoplasmic domain association with PI3-kinase. CD7 costimulation can induce cytokine secretion and modulate cellular adhesion.
