

## PE/Cyanine 5 Anti-Human CD1a Antibody[HI149]

Catalog Number: GFH00845G

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

### Description

|                         |                                                                                                                                                                                                            |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                                                      |
| Host                    | Mouse                                                                                                                                                                                                      |
| Isotype                 | Mouse IgG1, κ                                                                                                                                                                                              |
| Clone No.               | HI149                                                                                                                                                                                                      |
| Isotype Control         | [Product GFH09792G]                                                                                                                                                                                        |
| Conjugation             | PE/Cyanine 5                                                                                                                                                                                               |
| Conjugation Information | PE/Cyanine5 is designed to be excited by the Blue (488 nm), Green (532 nm) and yellow-green (561 nm) lasers and detected using an optical filter centered near 670 nm (e.g., a 690/50 nm bandpass filter). |
| Storage Buffer          | Phosphate buffered solution, pH 7.2, containing 0.09% sodium azide.                                                                                                                                        |

### Applications

FCM

### Recommended usage

Each lot of this antibody is quality control tested by flow cytometric analysis. **The amount of the reagent is suggested to be used 5 μL of antibody per test (million cells in 100 μL staining volume or per 100 μL of whole blood).** Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

### Data

Staining of the Molt-4 cell line with PE/Cyanine5 Anti-Human CD1a Antibody[HI149] (filled gray histogram) or PE/Cyanine5 Mouse IgG1, κ Isotype Control (empty black histogram). Total viable cells were used for analysis.

### Preparation & Storage

|          |                                                                                                                                                           |
|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Storage  | Keep as concentrated solution.<br>This product can be stored at 2-8°C for 12 months. Please protected from prolonged exposure to light and do not freeze. |
| Shipping | Ice bag                                                                                                                                                   |

### Antigen Information

|                 |                                                                                                    |
|-----------------|----------------------------------------------------------------------------------------------------|
| Alternate Names | T6;R4;CD 1a;CD1A;T-cell surface glycoprotein CD1a;CD1a抗体;CD1a流式抗体;人CD1a;人CD1a抗体;人CD1a流式抗体;GFH00845 |
| Uniprot ID      | P06126                                                                                             |

### For Research Use Only

**Gene ID**

909

**Background**

CD1a is a 49 kD member of the immunoglobulin superfamily also known as T6 and R4. It is a type I membrane glycoprotein with structural similarities to MHC class I and is non-covalently associated with  $\beta$ 2-microglobulin. CD1a plays a role in non-peptide glycolipid antigen presentation to CD1-restricted T cells. It is expressed on cortical double positive and single positive thymocytes, Langerhans cells, and dendritic cells. In addition to antigen presentation, CD1a has been implicated in thymic T cell development.
