

## CDKL4 Polyclonal Antibody

catalog number: E-AB-19685

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

### Description

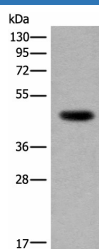

<b>Reactivity</b>	Human;Mouse
<b>Immunogen</b>	Synthetic peptide of human CDKL4
<b>Host</b>	Rabbit
<b>Isotype</b>	IgG
<b>Purification</b>	Antigen affinity purification
<b>Conjugation</b>	Unconjugated
<b>Buffer</b>	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.

### Applications

### Recommended Dilution

<b>WB</b>	1:500-1:2000
<b>IHC</b>	1:30-1:150

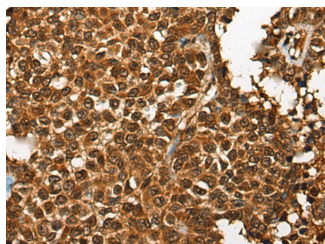

### Data

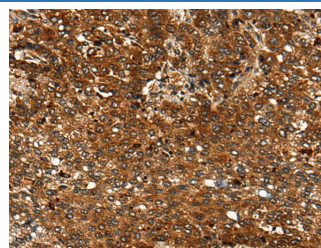

Western blot analysis of Human heart tissue lysate using CDKL4 Polyclonal Antibody at dilution of 1:350

**Observed-MV: Refer to figures**

**Calculated-MV: 43 kDa**

Immunohistochemistry of paraffin-embedded Human ovarian cancer tissue using CDKL4 Polyclonal Antibody at dilution of 1:35(×200)

Immunohistochemistry of paraffin-embedded Human liver cancer tissue using CDKL4 Polyclonal Antibody at dilution of 1:35(×200)

### Preparation & Storage

<b>Storage</b>	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
<b>Shipping</b>	The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended.

### Background

### For Research Use Only

Cell cycle progression is controlled in part by a family of cyclin proteins and cyclin dependent kinases (Cdks). Cdk proteins work in concert with the cyclins to phosphorylate key substrates involved in each phase of cell cycle progression. Another family of proteins, Cdk inhibitors, also plays a role in regulating the cell cycle by binding to cyclin-Cdk complexes and modulating their activity. Cdks are considered potential targets for anti-cancer therapy due to their involvement with cell cycle regulation. Cdks are also involved in the regulation of transcription and mRNA processing. CdkL4 (cyclin-dependent kinase-like 4) is a 315 amino acid protein that belongs to the CMGC Ser/Thr protein kinase family and may be involved in cell cycle regulation.
