A Reliable Research Partner in Life Science and Medicine

SPCS2 Polyclonal Antibody

catalog number: E-AB-18383

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity Human; Mouse; Rat

Immunogen Fusion protein of human SPCS2

Host Rabbit
Isotype IgG

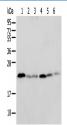

Purification Antigen affinity purification

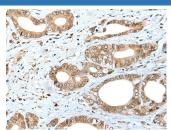

Buffer Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.

Applications Recommended Dilution

WB 1:500-1:2000 **IHC** 1:30-1:150

Data

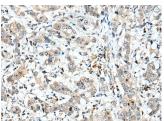

Western blot analysis of K-562 cell Human placenta tissue Immunohistochemistry of paraffin-embedded Human gastric Mouse adrenal gland tissue HT-29 cell NIH/3T3 cell Rat lung cancer tissue using SPCS2 Polyclonal Antibody at dilution of tissue using SPCS2 Polyclonal Antibody at dilution of 1:500 1:40(×200)

Observed-MW:Refer to figures

Calculated-MW:25 kDa

Immunohistochemistry of paraffin-embedded Human breast cancer tissue using SPCS2 Polyclonal Antibody at dilution of $1:40(\times 200)$

Preparation & Storage

Storage Storage Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.

Shipping The product is shipped with ice pack, upon receipt, store it immediately at the

temperature recommended.

Background

A Reliable Research Partner in Life Science and Medicine

SPCS2 (signal peptidase complex subunit 2), also known as SPC25 or microsomal signal peptidase 25 kDa subunit, is a 226 amino acid multi-pass membrane protein that localizes to both the microsome and the endoplasmic reticulum (ER), and belongs to the SPCS (signal peptidase complex subunit) family. Existing as a component of the microsomal signal peptidase complex which consists of five members, SPCS2 removes signal peptides from nascent proteins as they are translocated into the lumen of the ER. The gene encoding SPCS2 is located on human chromosome 11, which houses over 1,400 genes and comprises nearly 4% of the human genome.
